

TECHNART 2025

International Conference on Analytical Techniques for Heritage Studies and Conservation

Perugia, 6th – 9th May, 2025

Poster List

| Poster List | | |
|-------------|--|---|
| N° | Name, Organization, Country | Poster Title |
| 1 | Nicodemo Abate ISPC-CNR, Italy | <i>SATCULT: Closing the Knowledge Gap – Vocational Training About EO Services in Cultural Heritage Preservation</i> |
| 2 | Romisaa Abdelrahman AGH University of Krakow, Poland | <i>Integrating X-ray Fluorescence and X-ray Computed Tomography for Comprehensive Analysis of Historical Ceramics from Cracow District</i> |
| 3 | Miriam Alberico La Sapienza University of Rome, Italy | <i>Mixed Iron Based Inks: Insights in the Role of Carbon and How it can Affect the Ink Degradation Mechanism</i> |
| 4 | Mayra Albuquerque University of São Paulo, Brazil | <i>Multimodal Analysis of Cândido Portinari's Paint Tubes and "São Jorge" Mural Painting</i> |
| 5 | Ehab Al-Emam University of Antwerp, Belgium | <i>Inlaying Paint Pastes in Islamic Architectural Buildings: an Attempt to Unravel This Technique</i> |
| 6 | Matthias Alfeld TU Delft, The Netherlands | <i>SMART*LIGHT For Heritage Science: a New Inverse Compton X-Ray Source from the Netherlands</i> |
| 7 | Rosario Andolina ISPC-CNR, Italy | <i>Classification of Egyptian Funerary Nets from MA-XRF</i> |
| 8 | Lorenzo Angiolini Bundesanstalt für Materialforschung und -prüfung (BAM), Germany | <i>Reading the Unreadable: Using XRF and NIR Reflectography to Access the Herculaneum Library</i> |
| 9 | Paola Artoni University of Verona, Italy | <i>The Pictorial Technique in Ceruti's Paintings: a Holistic Interdisciplinary Study Based On Multi-Band Imaging Diagnostics and Written Sources Review</i> |
| 10 | Nefeli Avgerou Jerzy Haber Institute of Catalysis and Surface Chemistry, Poland | <i>Analysis of Cracking of Historical Glass with the Acoustic Emission Technique</i> |
| 11 | Donatella Banti Courtauld Institute of Art, United Kingdom | <i>Franciszka Themerson's White Paintings: a Case Study for Understanding Surface Phenomena in Modern Paintings</i> |
| 12 | Dora Francesca Barbolla ISPC-CNR, Italy | <i>CHANGES Project: Discrete Wavelet Transform to Reduce Surface Scattering in GPR Sections</i> |
| 13 | Lucile Beck CEA/LSCE/LMC14, France | <i>Carbon Isotopes to Characterize Lead White Ground Layers of the 20th Century. Application to the Pierre Soulages' Paintings</i> |
| 14 | Massimo Beltrame HERCULES Laboratory, Portugal | <i>Glaze Ceramic Introduction and Consumption in the Garb Al-Andalus</i> |
| 15 | Victoria Beltran University of Antwerp, Belgium | <i>Assessing VOC and SVOC Emissions in Ethnographic Collections by SPME-GC/MS</i> |
| 16 | Sanne Berbers University of Amsterdam - Cultural Heritage Agency of the Netherlands, The Netherlands | <i>Interpreting the Molecular Complexity of the Basic Synthetic Organic Dyes Present in Historical PTMA Pigment Samples Explored Using HPLC-PDA-HRMS</i> |
| 17 | Camille Berruyer Novitom, France | <i>From Specimen to Digital Twin: High-Throughput Pipeline for Synchrotron Imaging of Museum Collections</i> |
| 18 | Ilaria Bonaduce University of Pisa, Italy | <i>Characterization of Commercial Animal Glues for Restoration</i> |

| | | |
|----|--|---|
| 19 | Alessandra Botteon ISPC-CNR, Italy | <i>Advanced Investigation of the Book of the Dead of Kha at the Museo Egizio of Turin: a MOLAB E-RIHS In-Situ Study</i> |
| 20 | Silvia Bottura Scardina University of Évora, Portugal | <i>Illuminating the Past: A Technical Study of the Genealogia do Infante D. Fernando</i> |
| 21 | Anna Breger University of Cambridge, United Kingdom | <i>Reconstructing Medieval Music from Multispectral Images: A Case Study</i> |
| 22 | Frédérique Broers Rijksmuseum, The Netherlands | <i>A Study of Corrosion Products In and On Tin-Alloy Objects from Dutch East India Company Shipwrecks</i> |
| 23 | Magali Brunet CEMES - CNRS, France | <i>Historical Primers on Heritage Aircraft: Analysis of the Zinc-Chromate Anticorrosion Pigments</i> |
| 24 | Lucia Burgio Victoria and Albert Museum, United Kingdom | <i>Scientific Analysis of V&A and Beinecke Library Illuminations Attributed to Attavante Degli Attavanti and Workshop</i> |
| 25 | Claudia Caliri ISPC-CNR, Italy | <i>Advancing Micro-XRF Imaging: a Novel Full-Field Approach For High-Resolution Elemental Mapping in Heritage Science</i> |
| 26 | Francesco Cantini IFAC-CNR, Italy | <i>Identification of The Manufacturing Process of Sardinian Bronze Statuary: a Research Project Through Neutron Techniques</i> |
| 27 | Anna Caria University of Cagliari, Italy | <i>Gold-Coating Removal from Historic/Archeological Artifacts Using a Thiourea-Iodine Charge-Transfer Adduct</i> |
| 28 | Giulia Caroti University of Pisa, Italy | <i>Why listening matters: the key role of elicitation studies in developing new cleaning tools for artworks</i> |
| 29 | Cristina Carsote National Museum of Romanian History, Romania | <i>Halloysite Nanotubes' Environmentally Beneficial Potential as Green Conservation Material for Leather</i> |
| 30 | Selen Ezgi Celik Utrecht University, The Netherlands | <i>Microfluidic Investigation of Evaporation Suppression and Salt Redistribution Induced by Paracoccus Denitrificans in Porous Media</i> |
| 31 | Yao Chen The Palace Museum, China | <i>Application of Hyperspectral Imaging Technology for Infomation Extraction from Thangka Paintings in the Palace Museum Collections</i> |
| 32 | Chih Lien Chi Tokyo National Research Institute for Cultural Properties, Japan | <i>Analysis of Green Coloring Materials in the Illustrated Natural History Books Owned by Takamatsu Matsudaira Family Using Hyperspectral Imaging</i> |
| 33 | Daniele Chiriu University of Cagliari, Italy | <i>Comparison of the Radon Exhalation Rate in Building Materials of Historical and Artistic Interest</i> |
| 34 | Brunella Cipolletta University of Naples Federico II, Italy | <i>Immobilized Trypsin – Enhanced MALDI-Imaging Analysis of Surfaces and Cross-Sections of Works of Art</i> |
| 35 | Lucy Cooper Bibliothèque Nationale de France, France | <i>Implementing a Non-Invasive Analytical Protocol for In-House Identification of Gemstones Present in the Collections of the Biblioteque Nationale De France</i> |
| 36 | Luisa Fernanda Corredor Arias University of Milano, Italy | <i>Cyanobacteria-Based Consolidation Technology (CYA-TECH)</i> |
| 37 | Chloë Coustet CNRS IPANEMA, France | <i>Investigating the Softening of 20th Century Oil Paints: Preliminary Results on Joan Mitchell and Georges Mathieu</i> |

| | | |
|----|---|--|
| 38 | Laura Cristina University of Milano-Bicocca, Italy | <i>Application of PIXE Analysis to Roman Brass in the Milan Area: A Provenance Study</i> |
| 39 | Kateryna D'Ayala University of Torino, Italy | <i>Preliminary Chemical Characterization of Core-Formed Glass Vessels From Olbia Pontica (Ukraine)</i> |
| 40 | Sara De Angelis Istituto Centrale per il Restauro, Italy | <i>Multi-Analytical Approach for the Conservation of the Urban Mural Nido Di Vespe By Lucamaleonte</i> |
| 41 | Nouchka De Keyser Rijksmuseum, The Netherlands | <i>Chasing Colors: Reconstructing Abraham Mignon's Degraded Yellow Rose with Historically Appropriate Pigments</i> |
| 42 | Giulia Sara de Vivo Rijksmuseum, The Netherlands | <i>"Con Questa Rosetta Tocca i Labbri e le Meluzze delle Gote" Visualizing Cennini's Recommendations on Flesh-Tone Build-Up Through MA-XRF</i> |
| 43 | Nathan De Vries University of Liège, Belgium | <i>High Resolution Multimodal Images Registration of Théo Van Rysselberghe's La dame en Blanc (1904)</i> |
| 44 | Catherine Defeyt University of Liège, Belgium | <i>Loosing Salvador Dali's St Anthony?</i> |
| 45 | Kirsten Derks University of Antwerp, Belgium | <i>Out of the Blue: Rachel Ruysch's (1664-1750) Use of Blue Grounds</i> |
| 46 | Edène Derzelle University of Liège, Belgium | <i>Identifying the Blockx Paints Fingerprint in Théo Van Rysselberghe's Portrait de Madame Charles Maus (1890)</i> |
| 47 | Giulia Di Cara University of Bologna, Italy | <i>Studies for Cleaning and Spectroscopic Characterization of Street Art</i> |
| 48 | Abdelrazek Elnaggar University of Ljubljana, Slovenia | <i>Insights on Spectroscopic Imaging and Analysis of Islamic-African Paper Amulets and Talismans Collection at the Slovene Ethnographic Museum, Slovenia</i> |
| 49 | Francesca Falcone ISPC-CNR, Italy | <i>Non-Invasive MA-XRPD and MA-XRF Analysis of Egyptian Wooden Funerary Stelae from the Hellenic National Archaeological Museum</i> |
| 50 | Teresa Ferreira University of Évora - HERCULES Laboratory, Portugal | <i>Exploring the Simulacra of St Clementina and St Simplicio: Materials, Techniques, and Kinship Connections</i> |
| 51 | Chiara Garagiola University of Torino, Italy | <i>The PITCH Project: a Laboratory-Based Phase Contrast X-Ray Imaging System for the Study and Characterization of Cultural Heritage Materials</i> |
| 52 | Jose F. Garcia University of Barcellona, Italy | <i>Development of a Smartphone-Based Color Analysis Method For Illuminated Manuscript Study</i> |
| 53 | Giulia Gasperuzzo La Sapienza University of Rome, Italy | <i>Polysaccharide and Protein from Microalgae: a Novel Material for Paper Conservation and Restoration</i> |
| 54 | Lucrezia Gatti University of Bologna, Italy | <i>Revealing the Past: Non-Invasive Pre-Screening Methods for Ancient Bones</i> |
| 55 | Ludovico Geminiani University of Insubria, Italy | <i>Monitoring Microbiological Colonization in Cultural Heritage Through Non-Invasive FTIR Spectroscopy</i> |
| 56 | Mareike Gerken Bruker Nano Analytics, Germany | <i>New Approaches for the Quantitative Analysis of Pesticides</i> |

| | | |
|----|---|---|
| 57 | Giulia Germinario ISPC-CNR, Italy | <i>Culinary and Food Consumption Practices at the Bronze Age Erimi-Laonin Tou Porakou in Cyprus: Organic Residues Analyses of Cooking Pots</i> |
| 58 | Silvia Giampaolo Enrico Fermi Historical Physics Museum and Study and Research Centre, Italy | <i>Residues on Roman Pottery: Extraction of Biomarkers Via ATR-FTIR and Machine Learning</i> |
| 59 | Alexandre Gillon Gip Arronax, France | <i>Trace Elements Analysis of 16th-Century Silver Coins Minted in Nantes - Coupled HE-PIXE and p-XRF Measurements</i> |
| 60 | Michele Gironda Bruker Nano Analytics, Germany | <i>The Quantitative Analysis of Iron Gall Inks: Standard Free and Supported Quantification</i> |
| 61 | Margherita Giugni La Sapienza University of Rome - ISPC-CNR, Italy | <i>Unveiling the Artistic Practice of Colantonio in Consegna della Regola Francescana Altarpiece: a Non-Invasive, In Situ Approach to Material Analysis in Capodimonte's Laboratory</i> |
| 62 | Margherita Gnemmi La Sapienza University of Rome, Italy | <i>Fine Tuning Artificial Aging in Oil Paint Mock-Ups by Coupling μ-MBI, ATR-FTIR and GC-MS</i> |
| 63 | Giulia Gorla University of the Basque Country, Spain | <i>Non-Destructive Analysis of Historical Stonework for Degradation Assessment: the Case of San Emeterio Church</i> |
| 64 | Katerina Grigoriadou Centre for the Study of Manuscript Cultures - University of Hamburg, Germany | <i>Exploring the Inks of the Cretan Scribe Ioannes Rhosos in Manuscripts Produced for Cardinal Bessarion through μ-XRF</i> |
| 65 | Lou Groscol Archéosciences Bordeaux - CNRS, France | <i>Isola Bella and Compiègne, the Place to Be for Napoleon's Garden Parties. Non-Invasive Materials Study of Two 19th-Century Goupil&Cie's Engravings (Bordeaux Aquitaine Museum)</i> |
| 66 | Nicolò Guarnieri Politecnico di Milano, Italy | <i>Non-Invasive Investigation of Light-Induced Ageing Effects on Street Art Paints Through Micro-SORS</i> |
| 67 | Julie Guiraud Archéosciences Bordeaux, France | <i>Colours of the Wind : Investigating the Uses and Materials of a Selection of Fans (18th-19th C.) Using Mobile Spectroscopic Techniques (Aquitaine Museum, France)</i> |
| 68 | Jennifer Huidobro University of the Basque Country, Spain | <i>Neutron Imaging for Assessing Volcanic-Based Mortars at Archaeological Sites</i> |
| 69 | Marcella Ioele Istituto Centrale per il Restauro, Italy | <i>Preserving Paper Artifacts: the Use of Nanocellulose for Japanese Woodblock Prints</i> |
| 70 | Adriana Iuliano Archéosciences Bordeaux - University Bordeaux Montaigne, France | <i>Scaling Up the Study of Wall Paintings in Roman Gaul: a Multi-Analytical Approach to Understand Painting Practices in Limonum</i> |
| 71 | Koen Janssens University of Antwerp, Belgium | <i>Combined Remote, Macro- and Micro-Level Ris Using a Single Vnir Camera: Critical Comparison to MA-XRF and MA-XRPD</i> |
| 72 | Daniel José Jiménez Desmond University of Vigo, Spain | <i>Laser Cleaning of Siliceous Black Crusts from Granite Collected at C ôa Valley Archaeological Park (Portugal)</i> |
| 73 | Kilian Laclavetine C2RMF, France | <i>Revealing Printmaking Practices in 16th Century France Through Ink Characterisation</i> |
| 74 | Stefano Legnaioli ICCOM-CNR, Italy | <i>The Gardener of the Grand Duke: History and Analysis of Ms. 462 Hortus Pisanus, Icones Variarum Plantarum</i> |
| 75 | Paola Letardi IAS-CNR, Italy | <i>Natural Marine Weathering for Testing Bronze Surface Protective Treatments</i> |

| | | |
|----|---|--|
| 76 | Pablo Londero Louvre Abu Dhabi Museum, United Arab Emirates | <i>Large-Scale Multi-Technique Analysis of Gilt-Leather Wall Coverings: Characterization of Construction and Restoration Materials</i> |
| 77 | Sveva Longo ISPC-CNR, Italy | <i>The Doors of the Basilica di San Marco: A Scientific Examination through MA-XRF</i> |
| 78 | Laura Maestro-Guijarro Institute of Physical Chemistry "Blas Cabrera" - CSIC, Spain | <i>Multianalytical Approach for Laser Cleaning Assessment of Ancient Tapestries</i> |
| 79 | Maite Maguregui University of the Basque Country, Spain | <i>Safe-and-Sustainable-by-Design Approach for Developing Greener Materials for Cultural Heritage</i> |
| 80 | Elisabeth Manship Independent Researcher-Conservator, United States | <i>Ghirlandaio's Blue: a SEM Study of Smalt in the Tornabuoni Chapel in Santa Maria Novella Church, Florence</i> |
| 81 | Marta Manso Universidade NOVA, Portugal | <i>Patinas on Silverwork: an Analytical Approach for Distinguishing Intentionally and Naturally Corroded Surfaces</i> |
| 82 | Giulia Marcucci University of Milano-Bicocca, Italy | <i>A Non-Invasive Multi-Analytical Study on the Glass-Gems Collection of the National Archaeological Museum of Aquileia</i> |
| 83 | Giuseppe Marotta University of Hamburg, Germany | <i>The Hidden Craft: Investigating Ink Erasure Techniques in Medieval Arabic Scribal Practices</i> |
| 84 | Elisabetta Martinelli Politecnico di Milano, Italy | <i>Enhancing Multimodal Hyperspectral Imaging Analysis Through Targeted Dimensionality Reduction and Data Fusion</i> |
| 85 | Ana Martins Van Gogh Museum, The Netherlands | <i>Condition Assessment Scanner (CAS): a Fast, High Precision Scanner to Assess and Monitor the Topography of Paintings</i> |
| 86 | Sara Mattana SCITEC-CNR, Italy | <i>Quantitative Monitoring of Photo-Oxidative Degradation of Cadmium Yellow Oil Paintings Using Spectroscopic Techniques and Mathematical Modeling</i> |
| 87 | Francisco Mederos-Henry Royal Institute for Cultural Heritage, Belgium | <i>Multianalytical Characterisation of Materials Used by Constant Permeke in the Rechtstaand Figuur Sculpture</i> |
| 88 | Lucia Noor Melita British Library, United Kingdom | <i>Non-Invasive Analysis of an Illuminated Manuscript from Shiraz – Revealing Techniques and Materials</i> |
| 89 | Jaynisha Mistry British Library, United Kingdom | <i>Leather Bloom: A Multi-Analytical Investigation of its Origins and Implications for Conservation</i> |
| 90 | Francesca Modugno University of Pisa, Italy | <i>Perspective: a Project Dedicated to the Development of Innovative Analytical Strategies for the Knowledge and Preventive Conservation of Plastic Heritage</i> |
| 91 | Raphael Moreau C2RMF, France | <i>Deciphering Pigments and Binders in Complex Mixtures: Identification and Quantification of SWIR Spectrum Using Fitting Strategies</i> |
| 92 | Maria Pia Morigi University of Bologna, Italy | <i>Development of an X-Ray Spectral CT Imaging System for Cultural Heritage</i> |
| 93 | Raysa Nardes Instituto Federal do Rio de Janeiro, Brazil | <i>A Multispectral Approach to the Characterization of Artworks by Brazilian Modernist Painter Djanira</i> |
| 94 | Luca Nodari ICMATE-CNR, Italy | <i>This isn't a Monkey Business: Materials and Techniques in Francis Bacon "Study for Chimpanzee"</i> |

| | | |
|-----|---|---|
| 95 | Margarida Nunes University of Évora, Portugal | <i>Unravelling the Link Between the Simulacra of St Clemente of Palácio Nacional de Queluz and St Fortunato & St Semuc of Santa Casa da Misericórdia de Almada</i> |
| 96 | Dmytro Nykonenko University of Torino, Italy | <i>Hyperspectral Imaging for Monitoring Lithobiontic Communities in the Archaeological Park of Pompeii</i> |
| 97 | Mathilde Occelli University of Antwerp, Belgium | <i>Waterproof Textiles in the Hippomobile Heritage Collection of KMKG-MRAH</i> |
| 98 | Ivan Oliverio La Sapienza University of Rome, Italy | <i>Elemental Features Extraction in X-Ray Fluorescence Spectroscopy through Machine Learning for Historical Pigments</i> |
| 99 | Jacopo Orsilli University of Milano-Bicocca, Italy | <i>TEY and FY Complementary Application for the Analysis of Layered Samples with XAS in Cultural Heritage Samples</i> |
| 100 | Mohamed Oujja Institute of Physical Chemistry "Blas Cabrera" - CSIC, Spain | <i>Surface and In-Depth Physical and Structural Changes on Dammar and Acrylic Varnishes Upon Artificial Aging</i> |
| 101 | Laura Paggi CNRS, France | <i>Optical Analysis of Gold as a Painting Material</i> |
| 102 | Emma Paolin University of Ljubljana, Slovenia | <i>Scientific Reconstruction of the Smell of a Historic Perfume through GC-MS-O and Sensory Analysis</i> |
| 103 | Hélène Pasco Université Grenoble Alpes - Institut Néel, France | <i>Physico-Chemical Study of Pigments and Inks Used in Manuscripts from La Grande Chartreuse</i> |
| 104 | Wallace Peaslee University of Cambridge, United Kingdom | <i>Multi-Class Normalized Potential Contrast and Applications to Multispectral Images of Manuscripts</i> |
| 105 | Ilaria Pecorelli University of Rome Tor Vergata, Italy | <i>A Novel Based Approach for Wax-Resin Lining Adhesive Removal</i> |
| 106 | Maria João Penetra University of Évora, Portugal | <i>Decoding the Past: Molecular and Microbial Signatures of Historical Parchments</i> |
| 107 | Ewa Pieta Institute of Nuclear Physics, Polish Academy of Sciences, Poland | <i>ATR-FTIR Mapping of Pigments, Binders, and Degradation Products in a 17th-Century Artwork</i> |
| 108 | Valentina Pintus Louvre Abu Dhabi Museum, United Arab Emirates | <i>Insights Into Gilt Leather Gold Varnish by Multianalytical PY-GC/MS Analyses</i> |
| 109 | Marta Porcaro La Sapienza University of Rome, Italy | <i>Analysis of Alloys and Corrosion Structures in Ancient Bronzes Using the Combined Protocol of X-Ray Fluorescence and Monte Carlo Simulation (XRF-MCS)</i> |
| 110 | Simone Porcinai Opificio delle Pietre Dure, Italy | <i>A Synergy Between Pictorial Skills and Macroscopic X-Ray Fluorescence Imaging to Produce High Tech Mock-Ups</i> |
| 111 | Stefania Porcu University of Cagliari, Italy | <i>3D Fluorescence Mapping as Non-Destructive Analysis of Pigments in Cultural Heritage</i> |
| 112 | Eva Luna Ravan ISPC-CNR, Italy | <i>Illegible Writings Recovered in Carbonized Fire Damaged Manuscripts with High Lateral Resolution and High Chemical Sensitivity μ-XRF Scanning: the Case of the Torino, BNU, L.II.14</i> |
| 113 | Klara Retko Institute for the Protection of Cultural Heritage of Slovenia, Slovenia | <i>Vibrational Spectroscopy Investigations in IPERION HS IDeLA, KHIPUS, and PePI Projects</i> |

| | | |
|-----|--|--|
| 114 | Cecilia Riccardizi University of Bologna, Italy | <i>Unveiling Ancient Maritime Secrets Through X-Ray Computed Tomography (CT): Iron-Based Finds from the Archaic Shipwreck of Giglio-Campese</i> |
| 115 | Cristiano Riminesi ISPC-CNR, Italy | <i>Insights on the Composition of Pompeian Pigments Into the Wall Paintings of the Domus di Arianna in Pompeii</i> |
| 116 | Valentina Risdonne National Trust, United Kingdom | <i>Developing a National Trust Paint Sample Archive</i> |
| 117 | Martina Romani INFN-Laboratori Nazionali di Frascati, Italy | <i>New Insights About Giorgio De Chirico's Painting Technique: the Automatic Materials Recognition of the Artwork Mobili nella Stanza (1927), by Machine Learning and Chemometric Approach Based on Spectroscopic Data</i> |
| 118 | Francesco Paolo Romano ISPC-CNR, Italy | <i>A Robotic Multimodal XRF–IR Spectrometer for Noninvasive In Situ Analysis of 3D Heritage Objects</i> |
| 119 | Nati Salvadó Polytechnic University of Catalunya, Spain | <i>Refining Conservation Strategies for Waterlogged Wooden Hulls: a Case Study Using X-Ray Tomography and SR-μXRD on XVII-Century Ships Fom Plaça Dels Carros</i> |
| 120 | Barbara Salvadori ISPC-CNR, Italy | <i>Unveiling Historic Mortars: High-Resolution SR-μXRPD and FPA-FTIR Insights into Binder Composition</i> |
| 121 | Gianluca Santagati ISPC-CNR, Italy | <i>Lab-Based XAS Spectroscopy in the Study of Pigment Materials Serving the FIXLAB Platform of E-RIHS</i> |
| 122 | Sowmeya Sathiyamani University of Hamburg, Germany | <i>Understanding Arabic Papyrus Protocols Through Material Analysis</i> |
| 123 | Alessandra Satta IOM-CNR, Italy | <i>Modelling the Degradation of Colors in Paintings: Yellow, Red and Prussian Blue</i> |
| 124 | Steven Saverwyns Royal Institute for Cultural Heritage, Belgium | <i>Unraveling Antedating in Belgian Abstract Modernism</i> |
| 125 | Dominique Scalarone University of Torino, Italy | <i>Unveiling Casorati's Colors and Studio Practice: a Multi-Analytical Study of a Tempera Masterpiece</i> |
| 126 | David Strivay University of Liège, Belgium | <i>Loosing Salvador Dali's St Anthony?</i> |
| 127 | Vojtěch Šupita Charles University, Czech Republic | <i>New Material and Technological Aspects of Red-Figure Pottery from Southern Italy</i> |
| 128 | Amelia Suzuki ISPC-CNR, Nottingham Trent University, Italy | <i>In-Depth Spectroscopic Analysis of CW NIR Laser Irradiation of Plattnerite to Thermally Recover Darkened Red Lead Wall Paintings</i> |
| 129 | Imre Szalóki Nuclear Security Department - HUN-REN Centre for Energy Research, Hungary | <i>Confocal Macro-XRF Spectrometer and FPM Model for Quantitative Analysis of Cultural Heritage, Biological and Nuclear Objects</i> |
| 130 | Camilla Tartaglia Getty Conservation Institute, United States | <i>Scientific Investigation Supporting the Conservation of a Contemporary Mural in Los Angeles: Challenges and Opportunities</i> |
| 131 | Edoardo Tartaglia Italian Institute of Technology - Ca' Foscari University, Italy | <i>Accelerated Methods for Reproducing Archaeological Bronze Patina: Stratigraphic Comparison and Implications for Conservation and Authentication</i> |
| 132 | Francesc Albert Tortosa Polytechnic University of Catalunya, Spain | <i>Study of Roman Wall Painting Mortars by X-Ray Computed Tomography and Complementary Techniques</i> |

| | | |
|-----|--|--|
| 133 | Paolo Triolo University of Genova, Italy | <i>Multispectral Imaging Gives New Insights on a Old Controversy on the Authenticity of a Raphael Painting</i> |
| 134 | Sara Valadas University of Évora - HERCULES Laboratory, Portugal | <i>The Van Goyen Project: On the Technical Evolution of a 17th-Century Dutch Artist</i> |
| 135 | Emma Vannini INO-CNR, Italy | <i>Preliminary Results on Diagnostic Assessments of High-Pressure Water Micronebuliser Cleaning Effects on Stone Surfaces</i> |
| 136 | Daniel Vavřík Institute of Theoretical and Applied Mechanics - Czech Science Academy, Czech Republic | <i>Exploration of the Paper Langweil Model of Prague Utilizing X-ray Computed Tomography</i> |
| 137 | Lisa Vergelli Istituto Centrale per il Restauro, Italy | <i>Multi-Diagnostic Analysis for Restoration of the 15th-Century Map of Italy from the Correr Museum of Venice</i> |
| 138 | Marina Vieri de Mitri Fernández ISPC-CNR, Italy | <i>Unveiling Microbial Spectral Fingerprints in Paper Artifacts Through Hyperspectral Imaging (HSI)</i> |
| 139 | Vojtěch Vilím Charles University - Institute of Inorganic Chemistry of Czech Academy of Sciences, Czech Republic | <i>Racemization of Animal Glues in Paintings</i> |
| 140 | Michal Vopálenský Czech Academy of Sciences - Institute of Theoretical and Applied Mechanics, Czech Republic | <i>3D Documentation of Tiny Metallic Objects: A Comparative Study on a Wax Seal Ring of Peter Vok of Rosenberg</i> |
| 141 | Xiangjun Wei Shanghai Synchrotron Radiation Facility, China | <i>Research on the Manufacturing Technology of Iron Sword Unearthed from a Han Tomb in Yangzhou</i> |
| 142 | Yanki Wong Leisure and Cultural Services Department - HKSAR, Hong Kong | <i>From Leftover to Classic: The Changes of Painting History of Postboxes and Telephone Booths</i> |
| 143 | Magdalena Wróbel-Szypula National Museum in Warsaw, Poland | <i>Analysis of Painting Technology Changes in Tadeusz Makowski's Works by Spectroscopic Methods</i> |
| 144 | Tzu-Yi Yang Imperial College London, United Kingdom | <i>Vibrational Spectroscopy on Matiros Sarian's 20th-Century Paintings</i> |
| 145 | Stella Zenga La Sapienza University of Rome, Italy | <i>Unveiling Colantonio's Artistic Practice in "San Francesco consegna la Regola": A Non-Invasive, in situ Approach to Drawing and Painting Procedures through IR and X-Rays in Capodimonte's Laboratory</i> |
| 146 | Feichi Zou The Palace Museum, China | <i>Periodic Corrosion Phenomenon and Liesegang Pattern-Cross-Section Analysis on Two Ancient Bronze Samples</i> |
| 147 | Tomas Markevicius University of Amsterdam, Netherlands | <i>May it be Light Again: First Application of Atomic Oxygen to Reverse Lead White Darkening</i> |
| 148 | Marcia Rizzutto University of São Paulo, Brazil | <i>Unveiling Almeida Júnior's Artistic Style: a Multi-Technique Study of His Late Masterpieces</i> |
| 149 | Roberta Zanini IIT - Center for Cultural Heritage Technology (CCHT) | <i>Evaluating Analytical Methods for Ancient Glass: Validation of Micro-XRF Quantitative Data Through Comparison with LA-ICP-MS</i> |

TECHNART 2025

International Conference on Analytical Techniques for Heritage Studies and Conservation

Perugia, 6th – 9th May, 2025
